「VIVARE」 Control Button Overview

①

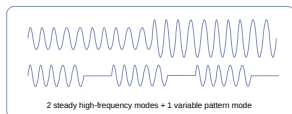

②

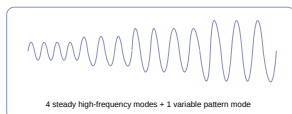

③

- ① External Teasing Vibration (Tail): 2 intensity levels + 1 pattern mode
- ② Clitoral Vibration: 4 intensity levels + 1 pattern mode
- ③ Internal Tapping Stimulation: 6 intensity levels + 2 pattern modes

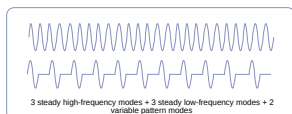

「VIVARE」 Mode Guide

External Teasing
Vibration (Tail)
(3 modes total)

Clitoral Vibration
(5 modes total)

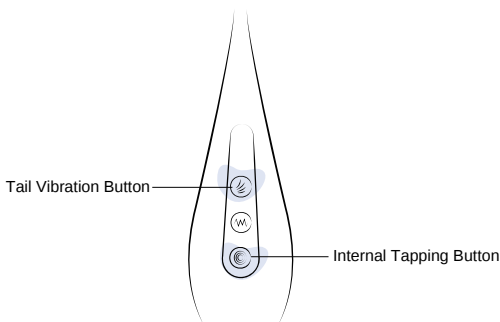

Internal Tapping
Stimulation
(8 modes total)

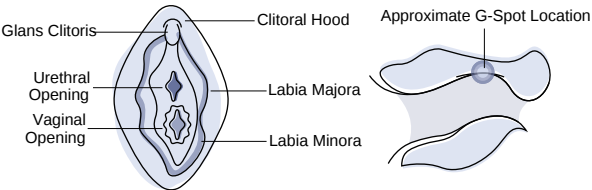

Travel Lock

If you need to carry the **VIVARE** while traveling, press and hold the **Tail Vibration Button** and **Internal Tapping Button** simultaneously for 3 seconds. The travel lock is activated when the indicator lights on all three buttons flash 3 times in unison. This prevents accidental activation of the device during transport.

To deactivate the travel lock, repeat the same steps ~

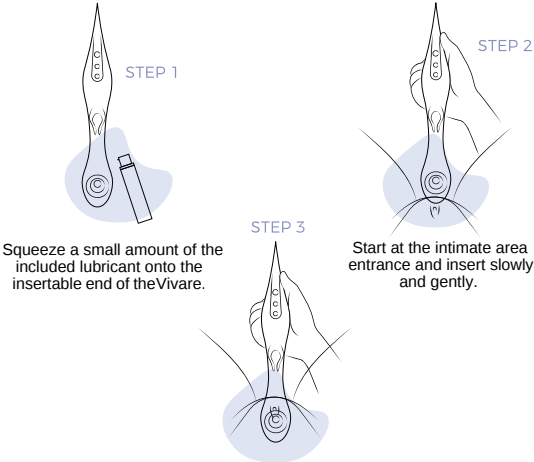

1. Understanding Your Anatomy

Introduction to the Clitoral C-Spot

Introduction to the Internal G-Spot

2. Pre-Use Preparation

Squeeze a small amount of the included lubricant onto the insertable end of the Vivare.

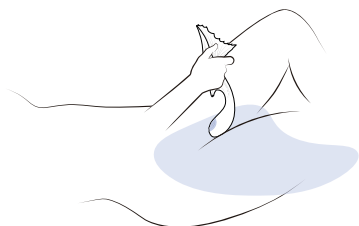

Start at the intimate area entrance and insert slowly and gently.

Hold the tail of the Vivare and insert slowly.

3. Operating Instructions

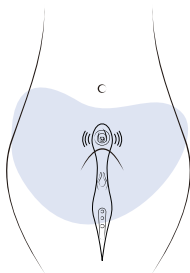

– [External Warm-Up]

Use the tapping function or tail vibration function of the Vivare. Gently apply it to the clitoris or other intimate areas for stimulation to help awaken arousal.

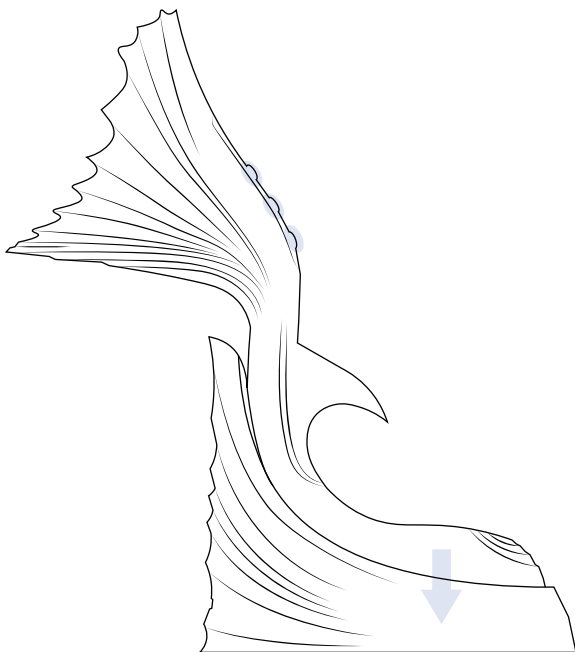

– [Internal Tapping]

After completing pre-use preparation, press and hold the **Internal Tapping Button** to activate G-spot tapping stimulation. Once inserted, you may freely adjust the angle and mode to your preference, and press the **Clitoral Vibration Button** to enjoy simultaneous internal and external stimulation.

Place the **Vivare** on the charging base and connect to a power source to start charging.

All three button indicators pulse slowly: Charging in progress

All three button indicators stay solid: Charging complete

A full charge takes approximately 60 minutes.

When fully charged, the **Vivare** delivers over 40 minutes of continuous use.

- ① The Vivare body is constructed from food-grade silicone with an IPX7 waterproof rating. Note: The charging dock is **NOT** waterproof. The device can be safely rinsed with water after use. Soaking the device or cleaning it with alcohol-based products is not recommended, as this may shorten its service life.
- ② After cleaning, wipe the device dry and place it on the charging dock (prevent water from entering the charging dock) or store it in the included dust-proof storage pouch.
- ③ Charge the device once per month to maintain proper cycle performance of the lithium battery.
- ④ Avoid prolonged exposure to direct sunlight. Do not store the device in high-temperature environments.

Product Name: Vivare		Material: Food-grade silicone + ABS	
Number of motors: 3PCS			
Product dimensions: Main unit (227×34.5×99.5 mm), Charging base (121.5×65.5×103 mm)			
Insertable Length: 95 mm		Product Weight: 164.7 g (main unit), 96.9 g (charging base)	
Battery Capacity: 450 mAh		Rated Voltage: 3.7 V	
Rated Power: 3 W		Rated Current: 800 mA	
Charging Time: < 60 min		Operating Time: > 40 min	
Waterproof Rating: Main unit (IPX7), Charging base (not waterproof)			

Q1: Can the Vivare be rinsed directly with clean water before and after use?

A1: Yes! The main unit of the Vivare carries an IPX7 waterproof rating. You may safely rinse it with water after use. However, soaking the device or cleaning it with alcohol-based products is not recommended, as this may shorten its service life. Please note that the Vivare's charging base *is NOT* waterproof. To ensure proper function of the product, do not rinse the dock directly with clean water.

Q2: What should I do if I feel nervous about using an insertable intimate device?

A2: There is no need to worry. The Vivare is a multi-functional device for both internal and external use, designed for intermediate users. There is no shame in exploring your body and discovering what brings you pleasure. We recommend starting in a comfortable, private and secure space. Activate the tail vibration teasing function of the Vivare, and gently glide it over other areas of your body to locate your sensitive spots and build arousal. Take it slow, then gradually move on to explore the clitoris and internal areas. Important: Always ensure you are fully aroused and use lubricant before internal use to avoid discomfort or injury during insertion.

Q3: Why do I feel discomfort or even a foreign body sensation during internal use?

A3: Rest assured that this is completely normal. Everyone's body responds differently and has varying levels of sensitivity. The G-spot inside the vagina is significantly less sensitive than the glans clitoris, so it can take time and patience to locate and explore. To accommodate users of different body types and heights, the Vivare shaft is built with a shape-retaining internal spine, allowing you to easily adjust the angle to find your internal sensitive spots.

As for the foreign body sensation, most internal discomfort stems from insufficient lubrication, low arousal, or muscle tension. We recommend stimulating the clitoris (C-spot) first. Clitoral orgasm helps awaken the sensitivity of the internal G-spot and makes internal use far more comfortable.

Never force insertion without adequate lubrication and full arousal. Doing so can easily damage the delicate vaginal lining, causing irritation, abrasions or even bleeding.

Q4: Can I bring the Vitality on an airplane?

A4: Yes, you can. Please note that the Vitality contains a built-in lithium-ion battery. To comply with airline safety regulations and ensure smooth travel, *do NOT* place the Vitality in checked baggage. It may be carried in your carry-on luggage and will pass through standard security screening.

We advise activating the travel lock before your trip to prevent accidental activation during transport.

Warranty Terms

- ① For the health and safety of all customers, intimate products are not eligible for trial use.
- ② The 14-day hassle-free return and exchange policy is valid only when the product's outer packaging shrink wrap remains intact and unopened.
- ③ The TAOF product is covered by a 1-year warranty from the date of purchase. This warranty applies to all quality issues caused by manufacturing or material defects.
- ④ This warranty covers damage resulting from inherent product quality issues. It does not cover cosmetic wear from normal long-term use, nor damage caused by improper operation, negligence or accidental circumstances.
- ⑤ Do not attempt to disassemble the product on your own. Unauthorized disassembly will void the free warranty service.
- ⑥ If you encounter any quality issues within the warranty period, please contact GETTAOF.COM through your purchase platform . We will provide a free product replacement and cover all return shipping costs.
- ⑦ Valid proof of purchase is required for all warranty claims to confirm the product is still within the warranty period. Please keep your purchase receipt in a safe place. Thank you for your understanding and support.
